DETAILED ACTION

Allowable Subject Matter

1. Claims 1-17 are allowed.
2. The following is a statement of reasons for the indication of allowable subject matter: The closest prior art is to Bennin et al (USPat. 5,839,193) and Horiuchi (USPat. 6,093,476) as discussed in the prior action of August 24, 2004. Applicant's claim amendments and arguments in support thereof are patentable over the closest prior art. Specifically, Bennin's laminate structure (10; Figure 3) begins with more than two layers as shown, as a result, etching (film removal) is required as a first step to arrive at applicant's invention. This is contrary to applicant's method as claimed. Further, Bennin does not teach a deposition step by a semi-additive method. Although Horiuchi teaches the semi-additive method, Applicant's arguments regarding the steps with which Bennin must conduct, but doesn't, to arrive at Applicant's invention is not remedied by Horiuchi.
